ADDITIONAL MEMORY LAYERS

- The text itself
  - └──> Maybe add a "summary" too?
- Versioning & Provenance
  - └─> Maybe an object in Metadata?
    - └──> NO: Keep the layer seperate
    - Keep Metadata flat & atomic

- emotional Data layer
  emotion { tone : anxious
            sentiment : -0.6
            intensity : 7 }

- Salience Scores based on Auto-decay & score
  retrieval priority
  - └──> Based on → shared centrality
    - → prompt usage frequency
    - → self-reference in future entries
    - → Explicit user marking

- Cross-Reference Anchors
  "linked_memory_ids" : ["mem_1", "mem_2"]

- embedding version history
  So you can upgrade embeddings
  over time without losing traceability
